## SUMMARY

Full stack web developer leveraging a background in behavior analysis to build a more accessible and meaningful user experience on the web. Recently earned a certificate from the UT Austin Coding Bootcamp in which I developed a passion for front end development, specializing in React.

## TECHNICAL SKILLS

**HTML, CSS, Javascript, JQuery, Node.js, Express, React.js, SQL/Sequelize, MongoDB/Mongoose, Github, Agile Methodology, Mocha/Chai**

## PROJECTS

**Canine Connection** | [Github](#) | <https://canineconnection.herokuapp.com/>

- A web app for finding lost dogs.
- My contribution to this project was setting up the server and backend framework, setting up the primary front end logic with react hooks, also form submission and client side form validation.
- MongoDB, React Hooks, Express (feathers), Node.js

**Behavior Tracker** | [Github](#) | <https://behavior-tracker-gtr.herokuapp.com/>

- A web app that track how many times you perform a behavior per week, as well as log the hours spent on each task.
- This was a small scale project that I used to better understand how to use react hooks, as I wanted to build a full MERN app from scratch by myself.
- MongoDB, React Hooks, Express (feathers), Node.js

**Date Night** | [Github](#) | <https://ut-group7.github.io/Group7Project/>

- A date planner that queries the ticketmaster and yelp APIs.
- My contribution included user authentication through firebase as well as writing queries for the APIs and assisting with front end logic.
- Firebase, Javascript, JQuery, Bootstrap
